## **PLSD students present in-depth research topics at Independent Study Fair**

**Perkins Township** – The annual Perkins Schools Independent Study Fair was held on March 15 at Perkins Middle School. Students in grades 4-8 conducted in-depth research on topics of their own choosing. Students also met with mentors, wrote research papers, created objectives following Bloom's Taxonomy, and prepared presentations to share with the community.

###

*Independent study is an in-depth, student-choice, investigative research project that requires students to conduct research to prove a thesis, to write the results of their research in MLA or APA format, to design complementary projects for each level of Bloom's Taxonomy, and to present the results of their investigation to the public at the annual Perkins Independent Study Fair.*
